

WaveSCM Ports & Terminals

Container, Bulk & Mixed/General Cargo Handling

WaveSCM Ports & Terminals is a comprehensive, fully integrated TOS-ERP platform created for small to medium sized ports and terminals. The system has extensive capabilities in areas of container, bulk (dry / breakbulk / liquid) and general cargo handling. It provides all the tools to plan and manage operational activities within the terminal, including vessel planning, vessel and landside operations, billing, equipment control, system integrations, VBS and much more.

WaveSCM PT is a modular system, allowing flexibility to implement substantial functionalities to meet operational needs within terminal operations, while being scalable to meet future growth.

Key Features of WaveSCM PT include:

- All Cargo Types
- Equipment Control
- Graphical Vessel / Yard
- Labour Allocation / Rostering
- VBS & Customer Web Portal
- ERP Ancillary Modules (HR, Safety, Rostering)
- Compliance Management
- Advanced Job Management
- Asset Management
- Advanced Integration Capabilities
- Extensive Reporting
- Mobile Applications (CHE & Users)
- Integration With WaveSCM LE
- Highly Configurable
- Available as SaaS and On-Premise
- Customised AI Capabilities
